

SIDDHARTH CHANDGUDE

MACHINE LEARNING ENGINEER

(AI, ML, Data Science)

+91 8669053722

siddchandgude@gmail.com

Pune, Maharashtra, India

PROFESSIONAL SUMMARY

Machine Learning Engineer with 3.5 years of experience delivering production-oriented machine learning, Generative AI, NLP, and analytics solutions. Experienced in developing LLM-powered conversational applications, Agentic AI workflows, Retrieval-Augmented Generation (RAG) systems, multi-agent orchestration, and predictive models for enterprise use cases. Proficient in Python, SQL, Azure, AWS, FastAPI, LangChain, AutoGen, and vector databases, with demonstrated impact in customer-interaction automation, operational analytics, investment targeting, and churn prediction.

EDUCATION

Bachelor of Engineering (B.E.),
Computer Science

- Pune University, Maharashtra, India
| 71.33%

CERTIFICATIONS

- Machine Learning in Production — DeepLearning.AI
- Advanced Data Analytics Certificate — Google

LANGUAGES

- English
- Hindi
- Marathi

WORK EXPERIENCE

SG ANALYTICS, PUNE, INDIA | APRIL 2024 – PRESENT MACHINE LEARNING ENGINEER

Automated Insights Generation

- Built Python and SQL analytics pipelines and executive dashboards to surface operational patterns, reduce manual analysis, and support resource-allocation decisions.

GenAI-Powered Call Center Automation

- Developed an Azure-hosted LLM/NLP virtual agent for insurance and member queries, achieving 70% end-to-end interaction resolution.
- Implemented NLP and transformer-based workflows for real-time topic identification, semantic intent extraction, and contextual escalation from call transcripts.

AION TECH SOLUTIONS LTD., INDIA | MARCH 2023 – MARCH 2024 MACHINE LEARNING ENGINEER

HNI/UHNI Client Retention Prediction

- Built predictive ML models using financial and demographic data to identify investment propensity and churn risk.
- Improved investment-targeting accuracy by 20% and churn detection by 30% through automated feature engineering and real-time alerts.

TECHNICAL SKILLS

- Agentic AI & Generative AI:** Agentic AI, AI agents, multi-agent systems, agent orchestration, AutoGen, LangChain, LlamaIndex, LLM applications, Retrieval-Augmented Generation (RAG), prompt engineering, prompt tuning, function calling, tool use, memory design, workflow automation, human-in-the-loop escalation, evaluation and guardrails
- LLMs & NLP:** GPT-3.5, GPT-4, BERT, Hugging Face Transformers, text classification, semantic search, embeddings, intent extraction, sentiment analysis, topic modeling, named entity recognition, tokenization, TF-IDF, Word2Vec, document processing
- Machine Learning & Deep Learning:** Scikit-learn, PyTorch, TensorFlow, Keras, supervised and unsupervised learning, XGBoost, LightGBM, random forest, gradient boosting, SVM, regression, clustering, ANN, CNN, transfer learning, time-series analysis
- Data & Engineering:** Python, SQL, Pandas, NumPy, SciPy, Apache Spark, ETL/ELT, data preprocessing, feature engineering, data pipelines, REST APIs, FastAPI, Flask, Git
- MLOps & Cloud:** Azure, AWS, SageMaker, EC2, S3, Docker, Kubernetes, Airflow, CI/CD, model deployment, model monitoring, ML pipelines, Pinecone, FAISS, vector databases
- Analytics & Visualization:** EDA, hypothesis testing, A/B testing, statistical modeling, dashboarding, Matplotlib, Seaborn, executive insights
